Claim Amendments

This listing of the claims will replace all prior versions, and listings, of claims in the application:

Claims 1-14 (cancelled).

**BEST AVAILABLE COPY**

Claim 15 (new): A blank label roll for making a pharmaceutical label for placement on a medicinal container, the blank label roll comprising:

a front printing face having an adhesive backing and consecutive perforated tear lines spaced apart at distances that are substantially greater than a perimeter of the medicinal container for defining an individual label section;

a backing sheet liner covering said adhesive backing;

said individual label section having a score formed therein defining a first portion and a second portion of said front printing face, said first portion having a length corresponding substantially to the perimeter of the of the container, said score defining a border between said first portion and said second portion, whereby said second portion

projects from the container when said first portion is  
attached to the container; and

**BEST AVAILABLE COPY**

said backing sheet liner having a liner score line formed  
therein corresponding to said score in said front face for  
removing said releasable backing liner from said first  
portion.

Claim 16 (new): The blank label roll according to claim 15,  
wherein said front face includes a further score line formed  
in said second portion which defines a third portion, said  
further score line defines a fold line between said second  
portion and said third portion.

Claim 17 (new): The blank label roll according to claim 16,  
wherein said backing sheet liner has a second liner score line  
formed therein which corresponds to said further score line  
for removing a portion of said backing sheet liner from said  
third portion, which allows said third portion to adhere to  
said second portion when said first portion is attached to the  
container.

Claim 18 (new): The blank label roll according to claim 15,  
wherein said roll is formed of thermal paper.

Claim 19 (new): A blank label roll for making a pharmaceutical label for placement on a medicinal container, the blank label roll comprising:

**BEST AVAILABLE COPY**

a front printing face having an adhesive backing and consecutive tear lines spaced apart at distances that are substantially greater than a perimeter of the medicinal container for defining an individual label section;

---

a backing sheet liner covering said adhesive backing;

said backing sheet liner having a liner score formed therein defining a first portion and a second portion of said individual label section, said first portion having a length corresponding substantially to the perimeter of the container, said liner score provided for removing said releasable backing liner from said first portion and said liner score defining a border between said first portion and said second portion, whereby said second portion projects from the container when said first portion is attached to the container.
